Rimo3™ and Liquidware™ for Modernized Application Lifecycle Management
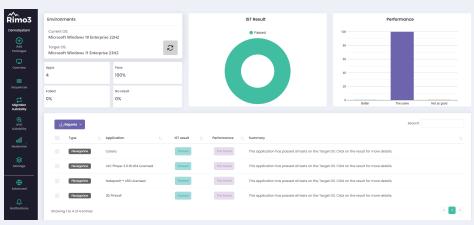

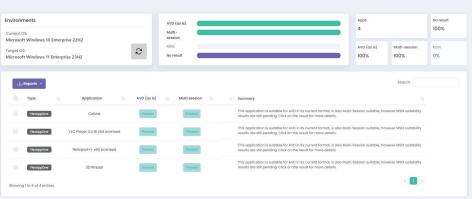

The collaboration between Rimo3 and Liquidware, focusing specifically on the FlexApp One™ container format, represents a significant stride in the realm of application deployment and management. For enterprises supporting large Windows® applications estates, this joint solution combines Rimo3's robust application testing capabilities with the innovative FlexApp One technology from Liquidware, creating a synergistic solution tailored for modern IT needs.

Through this joint offering, Rimo3 extends its automated application testing and migration prowess to encompass the Liquidware FlexApp One format – adding it alongside other industry leading app package formats like Microsoft® MSIX and App-V. This integration facilitates comprehensive testing across various environments, including Citrix®, VMware™, Windows 10, Windows 11, multi-session environments, Microsoft AVD (Azure Virtual Desktop), and Windows 365. Such extensive coverage ensures that applications are rigorously assessed for compatibility and performance, thereby reducing the risks associated with deployment.

FlexApp One Windows 11 Suitability

FlexApp One AVD Suitability

Liquidware FlexApp™ delivers portable attached applications that eliminates modifying base image management for app delivery in any Windows enterprise. The optional FlexApp One format is a self-contained delivery method that enables apps to be deployed by any means necessary, including through Rimo3 and Microsoft Intune.

The scoring system employed by Rimo3 stands out as a crucial component, providing IT teams with quantifiable insights into an application's readiness for deployment. This scoring system simplifies decision-making processes and bolsters confidence in the deployment of applications. Rimo3's patented smoke test automation reduces countless hours of manual labor for IT, and helps enterprises maintain fully up to date Windows images across their physical and virtual infrastructure. The advanced API's in Rimo3's cloud platform easily integrates with ITIL workflows from leading vendors allowing enterprises to take the strongest advantage of their existing investments.

Further enhancing the solution is the capability to deploy FlexApp One containerized applications through Microsoft Intune. This feature emphasizes the solution's focus on streamlining the application lifecycle management process, offering an efficient and sophisticated approach to modernization.

The solution's effectiveness is visually represented through the interfaces of Rimo3 and the Microsoft Intune deployment page. These visuals, particularly focusing on the assignment group feature, underscore the user-friendly and practical nature of the solution.

Joint Benefits of Rimo3 and Liquidware FlexApp Integration:

- Enhanced ROI: The integration offers a significant return on investment by optimizing the application testing and deployment processes.
- Administrative Time Savings: IT administrators benefit from reduced time and effort in application testing and deployment.
- Rapid Production Turnaround: The solution enables faster transition of applications from development to production, benefiting organizational agility.
- Support for DevOps: Providing quick and reliable insights into application performance and compatibility, the solution is a valuable asset for DevOps teams.
- Superior Compatibility Success Rate: FlexApp One showcases a higher compatibility success rate in comparison to competitors, ensuring dependable application performance across various environments.

The Rimo3 and Liquidware FlexApp One integration delivers a comprehensive solution that enhances productivity, reduces costs, and optimizes application performance in complex IT landscapes. This partnership not only marks a technological breakthrough but also establishes new benchmarks in IT management and application deployment, addressing the critical needs of modern businesses and IT environments.
